

REMARKS

The applicant has received and reviewed the office action of April 26, 2007 wherein the office required election between Claims 1-5, claims 6-21 and claims 22-27 because the inventions are distinct from each other. For purposes of responding the applicant hereby elects claims 6-21 with traverse. The basis for the traverse is that a search of the method of making battery parts should also include the art of battery parts and battery terminals.
